	<p>pt maintained on regular bed. sent 8x1000 715 3070. suctioned PRN for small amounts of sputum. sputum ext sent this AM. pt & high with intact and patent & adequate urine output. incontinent of stool & 1 tube in. no pt pain or discomfort. voided - in state of alertness for needs. VSS & stable + incontinent of stool & 1 tube kept. in per external catheter. pt is no longer on death protocol. in as needed. M. Campbell</p>
Keep for	
at various x-ble	continue on FVS since continues to
have ↑ T-cells	in following.
with disease	D is coming back to clinic pt is stable
	w. Basil. to [Signature]
4/10/90	Social Work
	<p>pt increasingly more comprehensive & stable, "reality" of his injury seems to be settling in more. Also obvious lack of friends & family visiting has weighed very heavily on this pt as he realizes what he lost personally in his previous life-style. Continue to follow & support. [Signature]</p>
